[HTTPS://CSS-FOR-JS.DEV/](https://css-for-js.dev/)

LANGUAGE

English b1/c2
Spanish

EXPERIENCE

FREELANCE DEVELOPER

02/2023 - Present

I possess significant expertise in developing Minimum Viable Products (MVPs) from inception to completion. Additionally, I have collaborated closely with Chief Technology Officers (CTOs) and Chief Executive Officers (CEOs) on various startup initiatives.

- <https://thefoodtruckleague.com> - 2023 / 8 months - Using Nextjs, React, Typescript, Tailwind, SmartSuite, google Appsheet, redux-toolkit, deployment.
- Che lagarto hostels - 2024 / 6 months - <https://www.chelagarto.com> Nextjs - typescript - tailwind, redux toolkit
- Nuqlea Platform / 2023-2024 - 10 months - <https://www.nuqlea.com/> React - typescript - aws serverless
- Dikigo/ 2024 - 3 months - <https://dikigo.com/> Nextjs - typescript - zustand
- Blinktrip / 2023 - 1year 6 months - <https://www.blinktrip.co> used nextjs - materialui - tailwind - typescript - aws - strapi - redux toolkit
- theharvestgame website / 2022 - 3 months - <https://theharvestgame.com> used nextjs - materialui
- Defiant tech / 2023 - 5 months <https://defiantapp.tech/es> used Nextjs, Typescript, tailwind, sanity.io, redux.

EXPERIENCE

FOUNDING ENGINEER

BONDLY

09/24 - PRESENT

- As member number 10, we are in 0-1 startup stage. I've been involved in building and scaling products in dynamic a environment taking ownership of the entire product lifecycle.
- Successfully configured, developed and launched cookies consent feature to start tracking website leads
- Bondly scheduling tool totally rebuilt from scratch both admin and B2C.
- Utilized Typescript Nextjs, Remix, Nestjs, Supabase, AI tools.
- Focused on site traffic improvements (SEO/Meta fields/Google Analytics)

SENIOR FULL STACK ENGINEER

STACKZONE LTD

03/22 - 08/2023

- Contributed to enhancing the Web StackZone web application by advocating for best practices through code refactoring and mentorship.
- Efficiently integrated cost-management and operational frontend modules.
- Enhanced code readability and structure by employing TypeScript methodologies.
- Upgraded client core libraries from outdated versions to the latest ones.
- Developed Serverless Node APIs and managed a PostgreSQL database.
- Utilized React, TypeScript, AWS Serverless Framework, Redux-Saga, unit testing and e2e testing using Cypress

LEAD FRONTEND DEVELOPER

COMMIT STUDIO

11/21 - 03/2022

- Being a lead developer involves providing support to team members and creating new products and features.
- Introduced a credit partner platform for pedidos-ya, utilizing Next.js for client-side, APIs, and databases.
- Developed a CLI feature for e-commerce migration.
- Applied NEXTJS, React, TYPESCRIPT, MYSQL, REDUX-TOOLKIT, unit testing, and end-to-end testing.

SR SOFTWARE ENGINEER

SANTANDER TECNOLOGIA

06/20 - 11/21

- I served as the FRONTEND point person for the Checks Team, responsible for creating new microsites on the updated enterprise platform, encompassing user experience, development, and testing.
- Contributed to multiple microsite structure designs.
- Developed BFF with NESTjs.
- Conducted a Reactjs course with six sessions, covering fundamental Reactjs concepts for a group of 8-10 participants.

Applied REACT, NESTJS, TYPESCRIPT, REDUX-TOOLKIT, and unit-testing.

SOFTWARE ENGINEER

PARKASSIST

06/20 - 11/21

- Currently developing the next-generation parking administration platform using React and AWS.
- Successfully implemented high-performing features on the client side.

Proficient in utilizing AWS services like IAM, IoT, S3, and DynamoDB, along with React, TypeScript, Redux, and conducting unit testing.

SOFTWARE ENGINEER

VALTECH

01/17 - 06/19

- Proficient in both backend and front-end development.
- Effectively implemented Backoffice APIs using Java 8 with Spring Boot, Jersey, JPA, and MongoDB.
- Utilized Swagger for API documentation.

Successfully launched the Backoffice Frontend React application using React and STYLED-COMPONENTS design patterns.

BACKEND DEVELOPER - MULTIPLE COMPANIES / 01/14 - 01/17
